Lab #2

1-- Recode 2 different variables into new categories. They can both be continuous-ish or both be nominal-ish, or one of each. Tell me what you did and explain the variable(s).

2-- Use one (or both) of your recoded variables to do a cross-tabulation. Explain your results.

3-- Run a correlation of one variable with another variable; make all of the recodes necessary to make the correlation as easy to interpret as possible; and explain your results.

4-- Identify the most extreme cases on some variable. Interpret the results.
